# WIKING KABEL GmbH

## Cable solutions for marine applications

Your Challenge. Our Cable.

# Ready for Front-line Deployment

The highly specialized requirements encountered in marine and military applications necessitate the use of top-quality materials for conductors, insulation and sheaths. Customized special cables, thanks to their distinctive characteristics, ensure individually advantage us benefits.

Various international approvals, such as DNV or VG-95218 (Parts 60–66, Part 20 Types B & J) ensure flawless functionality. Customized special cable solutions for this sector meet even the toughest stipulations for flexibility and provide minimized cable weights, an extended useful lifetime and significantly enhanced efficiency.

The special cables are used for various applications in submarines, military ships and military helicopters:

- + Shielded and unshielded communication cables
- + Light heavy-current cables as control and power lines
- + Special cables for marine diesel engines

If you need special cabling for your ships, Wiking-Kabel is there for you, quick and flexible – with bespoke complete customer solutions developed exclusively for the extreme conditions of marine and off-shore.

Based on on almost 30 years of experience, we offer robust and long lasting cabling solutions for a variety of marine applications, for example:

- ▶ Power Cables
- ▶ Light power Cables
- ▶ Communication Cables with double or single screen
- ▶ Light communication cables with double or single screen
- ▶ Light Communication cables with double screen and screened triples

Various international approvals (e.g. DNV, VG approval 95218) ensure a smooth process.  
VG approval 95218:

- Part 60 MGSGO
- Part 61 LMGSGO
- Part 62 FMGSGO
- Part 63 FMSGSGO
- Part 64 LFMGSSGO
- Part 65 LFMSGSGO
- Part 66 LFMSGSSGO
